

ALP 7.5 Migration to 4D List 6.8

UNSUPPORTED FEATURES

This document presents Area List Pro[®] (ALP) 7.5 features which changed or are not supported in 4D List 6.8.

Advanced Properties

The ALP Advanced Properties dialog box is not available in 4D List 6.8.

However, you may retrieve your parameters in 4D List 6.8: in the previous version of your database, open the ALP Advanced Properties dialog box. In the “Preview” tab of the ALP Advanced Properties dialog, click on the **Copy Current Configuration to Clipboard** button. The code resulting of the defined parameters in the dialog box is then copied to the clipboard.

Paste this code in the form method of the form containing your 4D List area. Place the code in the “On Load” form event, so that your parameters will be taken into account as soon as the form will be loaded.

Language

- The following commands have not been duplicated in 4D List:

- AL_SetArrays
 - AL_InsertArrays
 - AL_SetForeClr
 - AL_SetBackClr
 - AL_SetDropDst
 - AL_SaveData
 - AL_RestoreData

- The *Selector* parameter of the AL_SetMiscColor command only accepts the integers 2 and 3 in 4D List.
