

4D v15.5 Release Notes (all products)

October 25th, 2017

Bug Fixed List

Available here: <http://bugs.4d.fr/fixedbacklist?Version=15.5>

List of the bug fixed in the previous versions

- <http://bugs.4d.fr/fixedbacklist?Version=15.4>
- <http://bugs.4d.fr/fixedbacklist?Version=15.3>
- <http://bugs.4d.fr/fixedbacklist?Version=15.2>
- <http://bugs.4d.fr/fixedbacklist?Version=15.1>

XML commands are now case sensitive

For a better XML compliance, the « DOM Count XML elements » and « DOM Get XML element » commands are now case sensitive. A new selector has been added to XML SET OPTIONS to restore the previous behaviour if needed. More information in the [documentation](#).

XML external entity resolution

The resolution of external file references used in XML entities is disabled by default for both the DOM and SAX XML parsers to enhance security. In case you need to allow external file references execution (as in previous versions), use the following syntax:

XML SET OPTIONS ("";XML external entity resolution;XML enabled)
